

THE BULLFX METATRADER 4 INSTALLATION GUIDE

Installing Metatrader 4

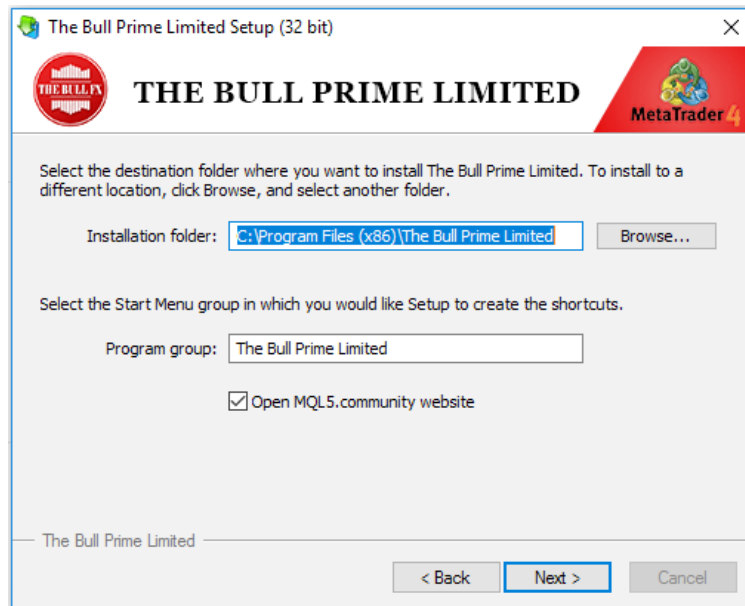

Once you have downloaded the MT4 executable program and saved this to your desktop, installation is fast and simple.

1. Double-click the MetaTrader exe file to install. This follows the same method for installing any Windows program.

2. Click the Next button after reading the notification message:

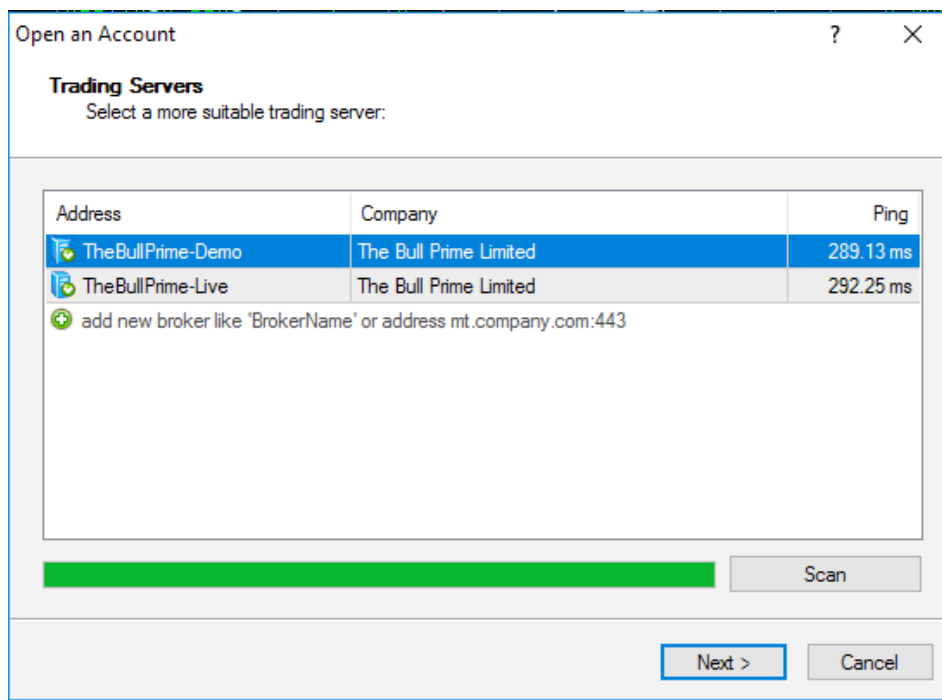

- 3.** Once you clicked the next button in the first dialog box you will be directed to this page. It will ask for an installation path. If you prefer to install the MT4 on a different location just specify a valid path of your choice.
- 4.** Select the correct installation folder on your computer, then click the Next button.
- 5.** As the program is being installed on your computer, the installation progress bar will fill.

Just wait for the program to finish installing.

7. You will receive the server and login details in an email when your account is created. Select the appropriate server and click Login server.appropriate server and click Login server.

8. If you received an email with your login details kindly select **existing trade account** in the selection and use the account **login** and **password** then click next. That's it! you may now start trading.
